MD's MESSAGE

Welcome to our fourth edition of FRAMED. I am delighted to update you on the recent changes and additions we have made over the past three months.

Neil Weatherstone, our new National Sales and Marketing Manager, joined us at the beginning of May and has already made some great inroads.

The opening of our new National Distribution Centre in late May was highly successful, bringing together our customers and almost all Lidco employees to celebrate this momentous occasion. Arran Horne, our Operations Manager, was able to showcase all of the positive changes we have made in terms of logistics and operations over the past six months.

We also launched our new Product Catalogue at the opening which is now available on the updated Lidco website. This new catalogue is a huge leap forward for us, consolidating our range and including the new indexing system for easy referencing.

This edition of FRAMED also incorporates the first series of Tech Talk from our Principal Designer, Stewart Silk. Tech Talk is aimed at providing our fabricators with plenty of useful technical advice about our products.

Our design team are working hard to ensure Lidco continues to offer the better choice of framing system to the residential and commercial markets, with superior service and technical advice.

Marco Belgiorio-Zegna AM
Managing Director

LATEST NEWS

WELCOME TO LIDCO

Neil Weatherstone (pictured), previously from Hunter Douglas, joins Lidco as our new National Sales and Marketing Manager. Neil brings a wealth of knowledge into this position along with his positive, professional and proactive attitude.

Kirstie McMillan has joined our Head Office in a new role of administrative assistant.

Terry Johnson joins our Brisbane sales office as Senior Account Manager to strengthen relationships with customers and specifiers in Queensland and the Northern Territory.

Two new appointments have been made to support our National Distribution Centre. Valerie Beckwith joins our Customer Service division and Bev Jacobs heads up our hardware shop.

2009/10 PRODUCT CATALOGUE

We are pleased to announce the release of the 2009/10 Product Catalogue, now available on the Lidco website in PDF and DWG formats. We believe that the current, streamlined catalogue is much more user friendly than previous editions. We have aimed at keeping this update as simple as possible by retaining the same system numbers for most systems.

The total number of systems on offer has been streamlined to 31, whilst still

covering a wide variety of applications from low rise residential projects to high rise commercial buildings.

You can view the entire range and consolidation of systems in the centrefold section of this edition of FRAMED.

For a copy of the new 2009/10 Product Catalogue please contact your local Lidco representative or call one of our offices.

NDC OPENING

A JOB WELL DONE

The opening of our new National Distribution Centre was heralded as a great success. With customers, suppliers, specifiers and Lidco staff present, we were able to showcase the significant investment made into the distribution and logistical sides of the business.

Arran Horne, our Operations Manager, was proud to present all the hard work he and his team have been doing over the past 12 months, such as the new cantilever racking, introduction of bin location labels with illustrations, increased efficiencies and many other great improvements. The movie slideshow detailing the move was very useful to explain how we arrived where we are today.

The new bin location labels are a huge step forward for Lidco as we are now able to accurately determine where a product is and what it looks like which enables much faster turn around of your order. Rolling stock takes will be performed quarterly giving you more

confidence when placing your next order with us.

We also took the opportunity to use the opening as a platform to launch our new 2009/10 Product Catalogue, which you can read about within this edition of FRAMED. The streamlined catalogues, hot off the press, are currently being distributed. If you missed out on the opening and would like to receive a copy of the Lidco Product Catalogue please contact your local Lidco representative.

We trust everyone left the day with a full stomach and a positive outlook about where Lidco is right now and where we are heading.

2009/10 PRODUCT CATALOGUE

TECH TALK

COMMERCIAL SWING DOOR STOP LOCATIONS

Tired of going back to jobs adjusting commercial swing doors after they have dropped because of incorrect toe and heeling procedures?

Well, Lidco offers a solution to this problem with the introduction of the rotating glass stop (part 03-547) as a stocked accessory item to compliment the 717 system commercial swing doors.

The rotating glass stop is easily fixed by way of drilling a 6mm dia hole in the centre of the glazing pocket, below, and then simply push the stop into the hole.

The adjusting stop may then be rotated left or right to leave a clear pocket ready for the glass installation, below.

Once stop is set into position opposite side to glass insertion point, the other side is then rotated to the stop position.

One setting block is placed under glass, below.

The glass adjusting screw, right, is then wound down to come in contact with the top of the glass, keep winding until the

STEWART SILK Principal Designer

Stewart Silk is our Principal Designer based at our Brisbane office.

Stewart's previous experience in Lidco's old fabrication arm of the business, no longer in operation, makes him the ideal contributor for this new series of Tech Talk.

Lidco's focus on supporting our customers is second to none, and should you have any further enquiries please do not hesitate in contacting Stewart.

style rises up to the correct position. For more information please contact your Lidco account manager.

411 SYSTEM PLANT ON WINDOW HEAD AND SILL FRAMING

Lidco are pleased to announce the re-introduction of the plant on window head and sill framing, formally known as the Lidco 411 system.

These are now located in the 740 System's C pages. These handy sections are available in mill finish with anodising or powdercoat finishes on request.

Sections remain at 6.5mt lengths in keeping with the remainder of the suite.

SOUND REDUCER 366 SYSTEM

The Lidco 366 High Performance Acoustic Sliding Door has been created to provide superior acoustic performance combined with aesthetic design and engineering integrity.

It is ideally suited to residential buildings, both high rise and low rise, where noise is a key concern.

The 366 System is engineered to be manufactured in a variety of framing combinations including 'Fixed Slide', 'Slide Fixed Slide' and centre bi-part options. It will also adapt to many fixed glass combinations for continuous floor to ceiling glazing.

WHO WE ARE

With 70 years experience in the architectural building industry, Lidco is one of Australia's market leaders in the development, commercialisation and distribution of architectural framing systems.

Lidco's extensive range of architectural framing systems provide a solution for each and every residential and commercial building project. From a small residential dwelling extension to a multistory building there is a Lidco system to suit. The Lidco range includes windows, doors, louvre systems, commercial glazing systems and unitised curtain walls.

Our Product Range Includes:

- * Aluminium Window Systems
- * Aluminium Door Systems
- * Shopfront Systems
- * Curtain Wall Systems & Façade Engineering
- * Custom Extrusion Die Development
- * Supply of building related hardware products
- * Adjustable + Fixed Louvre Systems
