

## Technical Memo No. 105

### 01-029M Window Roller for Lifestyle™ 112 System

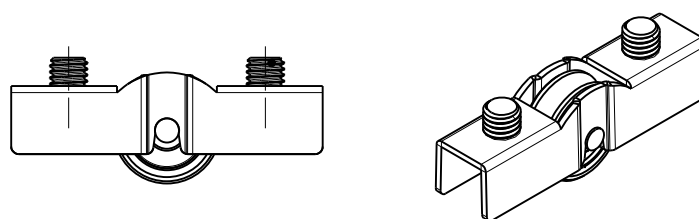

#### New Stainless Steel Roller for Lifestyle™ Sliding Window

Lidco is pleased to announce the addition of an all metal, stainless steel roller (01-029M) to the popular Lifestyle™ Sliding Window – 112 System range. The modified design of this new roller means that the existing LSS-102 rail can still be used with no modifications required to cutting formulae or tooling.

The new all metal roller provides improved strength and durability. It is capable of carrying loads up to 15kg, making it ideal for large, heavy sliding window sashes.
