

Technical Memo No. 109

New 00-018 Mortice Lock for Sliding Windows

Stylish New Sliding Window Mortice Lock

Introducing the new mortice sliding window lock with minimal visual impact to suit today's modern architecture. Innovative hideaway handle allows for low profile mounting on window sash.

Suitable for use with the DuoTherm™ Sliding/Stacking Window (372 System)

Available keyed alike for one key convenience with all door and window locks that use a 5 pin C4 key.

Features and Specifications

- Innovative hideaway handle for improved visual styling
- Includes Anti-Slam and Anti-Lift features for added security
- Snap on cover plates available in several colours
- Cover plate conceals the fixing screws for improved security
- High security, strong construction, attack resistance
- Low profile fitment improves styling and prevents interference with blinds
- CYL4® One Key Security – can be matched to most door locks for one key convenience
- Added security for sliding windows
- Non-handed latch system suits both left and right handed windows

Operation of the Lock

- Push the release button to unlatch window and reveal the hideaway handle
- Use the handle to open and close the window
- Push handle into the flush position to latch window
- Turn key 180 degrees to lock window
