

Technical Memo No. 112

Inward Opening Bifold Door Configuration - 615 System

Alternative Bifold Door Configuration

The popular *Lifestyle™* Bifold Door (615 System) can be installed in an inward opening configuration with the use of a sub-sill.

The inward opening configuration uses the same hardware as the standard outward opening configuration except for hinge hardware. Refer to the Hardware Selection Chart (Inward Opening Configuration) in the *Lifestyle™* Bifold Door Technical Manual.

A number of inward opening configurations are also now available in WindowMaker.

Note: the inward opening configuration is not suitable for exposed locations.
